Work Experience

Starbucks Corporation
SHIFT SUPERVISOR / BARISTA

2022 — PRESENT

• Promoted to Shift Supervisor in October 2023: directed daily operations, managed shifts, and coached staff to improve performance and compliance.

• Crafted 100+ beverages daily with speed and accuracy while maintaining exceptional customer service standards.

• Handled transactions, trained new team members, and ensured store cleanliness and compliance.

Target Corporation
ELECTRONICS TEAM MEMBER

2016 — 2021

• Executed keyholder responsibilities while managing electronics inventory and overseeing daily sales operations.

• Delivered personalized solutions to customer technology needs, improving engagement and satisfaction.

• Maintained accurate stock levels and cultivated a professional and welcoming store environment.

Supply Post E-Commerce Site
FULL-STACK DEVELOPER

(GITHUB REPOSITORY | HTML, CSS, JAVASCRIPT)

• Collaborated on a class-wide project to build a functional e-commerce platform for the brand Supply Post.

• Led version control management: oversaw commits, enforced best practices, and maintained repository integrity.

• Designed and implemented the homepage with a mobile-first approach, ensuring responsive, user-friendly layouts.

• Authored the README documentation and managed the GitHub repository to streamline collaboration and onboarding.

• Deployed the site via Vercel, managing deployment workflow and ensuring accessibility for testing and presentation.

Bulk Club Membership Program
FULL-STACK DEVELOPER

(GITHUB REPOSITORY | C++)

• Collaborated in a team to develop and refine a software system for Bulk Club, focusing on membership and sales management.

• Participated in joint coding sessions with code centralized and committed by a designated team member.

• Engaged in agile practices, ensuring project alignment with goals and timely delivery of milestones.

Simplitax

FULL-STACK DEVELOPER

([GITHUB REPOSITORY](#) | HTML, CSS)

• Engineered a responsive, user-friendly website for SimpliTax, a tool designed as a simple receipt generator integrated with a sales tax calculator that displays all user-entered items.

• Managed all aspects of development, from front-end layout and design to backend logic for sales tax calculations, ensuring system reliability and performance.

• Utilized modern CSS for styling to enhance visual appeal and user interaction, prioritizing intuitive design and usability.
